VITAL STATISTICS

for

1971

Printed Under the Authority of

THE HONOURABLE JOHN YAREMKO, B.A., Q.C. REGISTRAR GENERAL

THE HONOURABLE JOHN YAREMKO, B.A., Q.C. REGISTRAR GENERAL

Foreword

I take pleasure in presenting the 102nd Vital Statistics Report compiled by the Office of the Registrar General. This report is prepared in two parts.

Part I indicates the trend over the past years in the general state of health of the people of Ontario. Such general trends emphasize certain specific problems in the field of public health such as infant and maternal mortality and deaths from such diseases as heart and cancer.

Part II comprises detailed tables covering the various aspects of vital statistics for the Province of Ontario in 1971.

In conclusion, may I state that, while this report is primarily of interest to certain professions and agencies, it will give other interested persons an insight into the vital statistics concerning births, marriages and deaths in the Province of Ontario.

B.A., Q.C.

Registrar General

SIR:

I have the honour to submit for your approval the One-hundredand-second Vital Statistics Report made in conformity with and under the provisions of the Act respecting the Registration of Births, Marriages and Deaths in the Province of Ontario, for the year ending December 31st, 1971.

I have the honour to be, Sir,

Your obedient servant,

Deputy Registrar-General.

H. J. Humphies

To The Honourable John Yaremko, B.A., Q.C. Registrar General of Ontario

[†]Rates not computed for less than 5 stillbirths.
*Previous to 1962 stillbirths of 28 weeks' gestation and over were registered. As of January 1962 stillbirths of 20 weeks and over were registered. For the years 1962-1965 figures for 28 weeks and over may be obtained from Table 22 in the reports for those years and for 1966, 1967, 1968, 1969 and 1970 from Table 12. 1971, see Table 10.

Infant Mortality

Shown in Table I are the numbers of infant deaths by age at death over the ten-year period 1962 to 1971. The steadily decreasing neonatal and infant death rate and the stillbirth rate are shown in Chart 3.

INFANT AND NEONATAL MORTALITY AND STILLBIRTHS

CHART 3

ONTARIO, 1947-1971 RATES PER 1,000 LIVE BIRTHS

Maternal Mortality

Causes of maternal deaths and the trend of maternal mortality is shown in Table J.

TABLE J MATERNAL MORTALITY AND RATE PER 1,000 LIVE BIRTHS, ONTARIO, 1947-1971

General Mortality

The trend in general mortality over the period 1947 to 1971 is shown in Table K. Tables L and M illustrate the general mortality by age and/or cause. A special detailed table for cancer by sex, age-group and sites affected is shown in Table N. Special cross classification of accidental and violent deaths is shown in Table O.

TABLE K DEATHS (EXCLUSIVE OF STILLBIRTHS) AND DEATH RATES PER 1,000 POPULATION, ONTARIO, 1947-1971
